

PEŠTAN
CONFLUO
SMART DRAINS

WE ARE

We are privately held company Peštan, leader in the Balkans in production and distribution of products and solutions from polymers.

Company was founded in 1989 and has been producing water pipes made of polyethylene. Over time, we introduced new materials (polypropylene and PVC) and expanded product range. Today, in our offer you may find more than 6 500 products, divided into four categories:

**PIPING
SOLUTIONS**

**BATHROOM
SOLUTIONS**

**AGRICULTURE
SOLUTIONS**

**HOUSEHOLD
SOLUTIONS**

“Walk in” showers represent new and elegant solution for bathroom. A barrier-free shower concept inspired and motivated us to create Confluo Smart Drains program. We made our Confluo drains of high quality materials, modular, easy to install and clean, cost effective and with modern design, in order to satisfy all customer needs. With more then 350 different models in our offer, we believe we can meet all their needs.

Dive into our Confluo Drains and discover your new gem in bathroom!

Advantages of Confluo shower drains:

- Huge product portfolio — more than 350 different models
- Modularity
- Modern design
- High functionality
- Best buy products

Grid is made of stainless steel AISI 304. Optionally, we can produce grid from stainless steel AISI 316.</p> | <p>Load class of grid
Grid is classified as K3, which means that it can withstand 300kg of pressure.</p> | <p>Ceramic adjustment
Unlimited ceramic height leveling.</p> | |

Confluo Linear drains

We produce our Confluo Linear drains in 3 different models (Premium Line, Slim Line and Frameless line), 9 different sizes (300, 450, 550, 650, 750, 850, 950, 1050 and 1150 mm) and 3 different grid finishes (Stainless Steel, Glass and Gold). All models, except Slim, have 2 in 1 system where the same model can be used both with Stainless Steel/Gold and Tile/Glass finish and are characterized as ultra low 360 degrees rotatable self-cleaning S base.

Confluo Wall drain

As Peštan Company always follows trends on world market, we have prepared for our customers the latest model in world of shower drains — Wall drain. This model represents innovation in industry and, besides its new and modern design, it is perfect model for renovations and bathrooms with concealed cisterns. Wall drain has body made of plastic and it is supplied with 2 different grids (Stainless Steel and Gold).

Confluo Board

Peštan “Board” program of preinstalled shower drains represents the result of constant searching for better and more efficient solutions for our customers worldwide. With this product, we made a big step ahead concerning waterproofing, safety and aesthetic, as we have minimized possibility of mistake and significantly reduced the time and effort for installation. With this product, as a producer, we have taken responsibility on our side and made modern, quality and time effective solutions for our clients.

Confluo Standard drains

Peštan Company offers to clients more than 150 different models of Confluo Standard drains. All models have body made of plastic and grid made of stainless steel, glass or gold, which we deliver in various designs (Tide, Square, Drops, Black & White Glass, Ceramic and Gold) and sizes (10x10 cm, 15x15 cm and 20x20 cm). Main advantages are: Big variety of models, maximum flow rate, modular and flexible systems with 6 different output, 3 different types of siphons. You can make your own floor drain system easy for installation and maintenance.

Confluo Garden and Roof drains

In our program of outside drainage, we have 2 models — Confluo Top and Confluo Gardino. Confluo Top is used for drainage of water on flat roofs, and Confluo Gardino is made for driveways and garages. Main advantages of this models: Maximum flow rate, modular and flexible system with 4 different outputs, drainage/anti-leaves system, easy installation and maintenance.

Ultra low S base

Main advantages:

1. 360 degrees rotation
2. Superior flow rate — 48 l/min
 - DN 50 mm output
3. Ultra low — 50 mm
4. Acute angle of siphon — 40 degrees
5. Self-cleaning
 - Smooth plastic
 - Wide channel for water, without any obstacles

ALS

ANTI-LEAKING SYSTEM

ALS – Anti-Leaking System represents combination of drain construction and proper installation, which allows all leaked and condensated water under the tiles to go back to the drain.

During the years, water in bathroom has tendency to build under the tiles as consequence of erosion of grout and moisture in the bathroom. Usually it takes 5–7 years until this problem happens and then a leakage shows up in a place where waterproofing was finished. We have solved this problem with our construction of grid holder, where you have no barrier for water under the tiles. Also, in order that this system works properly, it is very important to do correct slope screed and proper waterproofing as per our instruction manual.

Cross section of linear drain

Confluo Slim Line is characterized with minimalist “Slim” design of stainless steel grid, which gives your bathroom a totally different and modern look. Model has possibility of grid leveling from 5-20 mm, which allows various options when you choose your bathroom surface. Anti-Leaking System - ALS is also one of the main advantages of “Slim”, which is designed in the way that all the condensed and leaked water under the tiles can go back to the drain without any obstacles.

Confluo **Slim** Line

Main advantages:

- Minimum installation height — 72 mm
- ALS — Anti-Leaking System
- Unique and minimalist design of grid
- 360 degrees rotatable self-cleaning S base
- Hight adjustable grid — 5—20 mm

Dimensions: 300, 450, 550, 650, 750, 850, 950, 1050, 1150 mm
