

Fluenta line of products

The product line "Fluenta" is the ideal choice for equipping bathrooms and sanitary facilities. The cisterns function impeccably in terms of energy-saving and quiet rinsing, they are invisible in space, and with large selection of flushing plates aesthetically correspond to the ambience, in accordance with your wishes. "Fluenta" built-in cistern with toilet bowl represents the ideal combination and a functional, highly reliable solution.

With the built-in cistern, you can select one of the simple and elegant flushing plates - Play, Active, Onyx or Diamond and pair them with a large selection of Evolution or Confluo drains. Both products, built-in cisterns and console toilet bowls are carefully designed to provide our costumers easy instalation and use. Perfect aesthetic appearance will make your space more pleasant, and the perfect functioning will represent a real pleasure for you.

Flushing plates

Console toilet bowl with "soft close" seat

Fluenta Basic is a console toilet bowl that ideally fits with our Fluenta concealed flushing cistern and together with it representing elegant and functional solution. In addition to the toilet, we also offer a modern wc seat with metal hinges and soft closing mechanism. This mechanism allows slow closing of the hoops and boards without user intervention. We deliver all elements for quick and easy installation with these products.
